

Problem Statement

The project aims to address the issue of finding and renting available workspace, necessary to meet various purposes and needs of interested individuals.

Goals and Objectives

The main goal of the project is to provide a simple and convenient process for renting workspaces, adapted to the diverse needs of professionals seeking a flexible work environment. The primary objective is to create a platform that ensures the achievement of the project's goal.

Expected Outcomes

The outcome should be a platform that offers all necessary functionality for searching and renting spaces. The platform should provide users with detailed information about the spaces, facilitate easy and quick rental, and allow users to manage their rentals by editing or canceling them as needed.

Target Audience and Stakeholders

This project serves a wide range of professionals across different fields, offering them a platform "OpenSpace" to easily rent workspaces that meet their unique requirements. Users include freelancers, entrepreneurs, and professionals from various industries. The project is crucial for both workspace providers and the main organization managing these shared workspaces.

Project constraints

- Timeline:
 - The completion deadline for the project is set for May 17, 2024.
- Financial Aspect:
 - Free of charge.
- Scope:
 - The project scope is intricately aligned with its overarching goals and objectives, aiming to offer a diverse range of workspaces for professionals.
- Quality:
 - The project is dedicated to meeting the primary goals outlined in the initial chapter, ensuring a high-quality experience for users.

Essential Resources

Team members, required software(Visual Studio IDE) and hardware (student laptops).

Risk Considerations

The primary risk associated with the project is the potential impact of team members' full-time commitments outside the project. We will employ comprehensive risk mitigation measures to guarantee the project's success in overcoming this challenge.
