Test Case ID	Title	Description	Preconditions	Test Data	Steps	Expected Results	Actual Results	Status	Comments	Bug Reports
TC-001	Testing the Register Functionality with valid data	Checking the registration of a new user with valid data	None	Email: testmail@gmail.com Password: 01test_passWord	1. Go to the site: https://openspaces.azurewebsites.net/OpenSpace	The site is opened	As expected	Pass		
					2. Click the 'Register' button in the navbar	The register page is opened	As expected	Pass		
					3. Enter the valid data into the fields	The entered data is accepted	As expected	Pass		
					4. Click the 'Sign Up' button	The confirmation link is sent to email	As expected	Pass		
					5. Click the confirmation link in the email box	The user is successfully registered	As expected	Pass		
TC-002	Testing the Register Functionality with invalid data	Checking the registration of a new user with invalid data	None	Email: testmail@gmail.com Password: test_password	1. Go to the site: https://openspaces.azurewebsites.net/OpenSpace	The site is opened	As expected	Pass		
					2. Click the 'Register' button in the navbar	The register page is opened	As expected	Pass		
					3. Enter the invalid data into the fields	The entered data is not accepted and the warning messages are shown	The warning messages are not displayed	Failed	The warning messages are not displayed in the registration form after entering the invalid data	Bug Report #1: https://docs.google.com/document/d/1Dysx5AkxFULEUgxZrsZmxiWbWnN9eXl18JmrHOnkgBE/edit?usp=sharing
					4. Click the 'Sign Up' button	The user is not registered	As expected	Pass		
TC-003	Testing the Login Functionality for user with valid data	Checking the login of user with valid data	The user is registered on the site	Email: testmail@gmail.com Password: 01test_passWord	1. Go to the site: https://openspaces.azurewebsites.net/OpenSpace	The site is opened	As expected	Pass		
					2. Click the 'Login' button in the navbar	The login page is opened	As expected	Pass		
					3. Enter the valid data into the fields	The entered data is accepted	As expected	Pass		
					4. Click the 'Sign In' button	The user is logged in and on the main page	As expected	Pass		
TC-004	Testing the Login Functionality for user with invalid data	Checking the login of user with invalid data	The user is registered on the site	Email: testmail@gmail.com Password: test_password	1. Go to the site: https://openspaces.azurewebsites.net/OpenSpace	The site is opened	As expected	Pass		

					2. Click the 'Login' button in the navbar	The login page is opened	As expected	Pass		
					3. Enter the invalid data into the fields	The entered data is not accepted and the warning messages are shown	As expected	Pass		
					4. Click the 'Sign In' button	The user is not logged in	As expected	Pass		
TC-005	Testing the Login Functionality for admin with valid data	Checking the login of admin with valid data	The admin is registered on the site	Email: admin@gmail.com Password: Qwerty1-	1. Go to the site: https://openspaces.azurewebsites.net/OpenSpace	The site is opened	As expected	Pass		
					2. Click the 'Login' button in the navbar	The login page is opened	As expected	Pass		
					3. Enter the valid data into the fields	The entered data is accepted	As expected	Pass		
					4. Click the 'Sign In' button	The admin is logged in and on the main page	As expected	Pass		
TC-006	Testing the Login Functionality for admin with invalid data	Checking the login of admin with invalid data	The admin is registered on the site	Email: admin@gmail.com Password: Qwerty	1. Go to the site: https://openspaces.azurewebsites.net/OpenSpace	The site is opened	As expected	Pass		
					2. Click the 'Login' button in the navbar	The login page is opened	As expected	Pass		
					3. Enter the invalid data into the fields	The entered data is not accepted and the warning messages are shown	As expected	Pass		
					4. Click the 'Sign In' button	The admin is not logged in	As expected	Pass		
TC-007	Testing the Forgot Password Functionality with valid data	Checking the reseting of password with valid data	The user is registered on the site	Email: testmail@gmail.com	1. Go to the site: https://openspaces.azurewebsites.net/OpenSpace	The site is opened	As expected	Pass		
					2. Click the 'Login' button in the navbar	The login page is opened	As expected	Pass		
					3. Click the 'Forgot Password' button	The forgot password page is opened	As expected	Pass		
					4. Enter the valid email into the field and submit	The confirmation link is sent to email	The confirmation link is not sent to email	Failed	The confirmation link is not sent to the mailbox in the 'Reset Password' form after entering the email	Bug Report #2: https://docs.google.com/document/d/1Dysx5AkxFULEUgxZrsZmxiWbWnN9eXI18JmrHOnkgBE/edit?usp=sharing
					5. Click the confirmation link in the email box	The reset password page is opened	Can't be executed	Blocked		
					6. Enter the valid new password into the field	The entered data is accepted	Can't be executed	Blocked		
					7. Click the 'Reset' button	The password is reset successfully	Can't be executed	Blocked		

TC-008	Testing the Forgot Password Functionality with invalid data	Checking the reseting of password with invalid data	The user is registered on the site	Email: testm@gmail.com	1. Go to the site: https://openspaces.azurewebsites.net/OpenSpace	The site is opened	As expected	Pass		
					2. Click the 'Login' button in the navbar	The login page is opened	As expected	Pass		
					3. Click the 'Forgot Password' button	The forgot password page is opened	As expected	Pass		
					4. Enter the invalid email into the field	The confirmation link is not sent to email and the warning message is shown	As expected	Pass		
TC-009	Testing the Create Functionality with valid data	Checking the creating of a new workspace by admin with valid data	1. The admin is logged in 2. The main page of the site is opened	Email: admin@gmail.com Password: Qwerty1-	1. Click the 'Add New Workspace' button	The creating page is opened	As expected	Pass		
					2. Enter the valid data into the fields	The entered data is accepted	As expected	Pass		
					3. Click the 'Post' button	The added workspace is shown on the main page	As expected	Pass		
TC-010	Testing the Create Functionality of workspace with invalid data	Checking the creating of a new workspace by admin with invalid data	1. The admin is logged in 2. The main page of the site is opened	Email: admin@gmail.com Password: Qwerty1-	1. Click the 'Add New Workspace' button	The creating page is opened	As expected	Pass		
					2. Enter the invalid data into the fields	The entered data is not accepted and the warning messages are shown	As expected	Pass		
					3. Click the 'Post' button	The new workspace is not added	As expected	Pass		
TC-011	Testing the Update Functionality of workspace with valid data	Checking the updating details of the workspace by admin with valid data	1. The admin is logged in 2. The main page of the site is opened	Email: admin@gmail.com Password: Qwerty1-	1. Click the 'Update' button on the workspace card	The updating page is opened	As expected	Pass		
					2. Enter the other valid data into the fields	The entered data is accepted	As expected	Pass		
					3. Click the 'Update' button	The edited workspace is shown with new data	The edited workspace is shown with old data	Failed	The edited workspace is displayed with the old data on the main page after updating its information	Bug Report #3: https://docs.google.com/document/d/1Dysx5AkxFULEUgxZrsZmxiWbWnN9eXl18JmrHOnkgBE/edit?usp=sharing
TC-012	Testing the Update Functionality of workspace with invalid data	Checking the updating details of the workspace by admin with invalid data	1. The admin is logged in 2. The main page of the site is opened	Email: admin@gmail.com Password: Qwerty1-	1. Click the 'Update' button on the workspace card	The updating page is opened	As expected	Pass		
					2. Enter the other invalid data into the fields	The entered data is not accepted and the warning messages are shown	As expected	Pass		
					3. Click the 'Update' button	The workspace is not updated	As expected	Pass		

TC-013	Testing the Delete Functionality of workspace	Checking the deleting of the workspace by admin	1. The admin is logged in 2. The main page of the site is opened	Email: admin@gmail.com Password: Qwerty1-	1. Click the 'Delete' button on the workspace card	The confirmation dialog is opened	As expected	Pass		
					2. Click the confirming button	The workspace is deleted successfully	As expected	Pass		
					3. Check the main page of the site	The deleted workspace is not shown	As expected	Pass		
TC-014	Testing the Create Functionality of reservation with valid data	Checking the creating of a new reservation by user with valid data	1. The user is logged in 2. The main page of the site is opened	Email: testmail@gmail.com Password: 01test_passWord	1. Click the workspace card	The workspace page with all details is opened	As expected	Pass		
					2. Click the 'Create Reservation' button	The creating page is opened	As expected	Pass		
					3. Enter the valid data into the fields	The entered data is accepted	As expected	Pass		
					4. Click the 'Post' button	The created reservation is shown in the profile	As expected	Pass		
TC-015	Testing the Create Functionality of reservation with invalid data	Checking the creating of a new reservation by user with invalid data	1. The user is logged in 2. The main page of the site is opened	Email: testmail@gmail.com Password: 01test_passWord	1. Click the workspace card	The workspace page with all details is opened	As expected	Pass		
					2. Click the 'Create Reservation' button	The creating page is opened	As expected	Pass		
					3. Enter the invalid data into the fields	The entered data is not accepted and the warning messages are shown	As expected	Pass		
					4. Click the 'Post' button	The reservation is not created	As expected	Pass		
TC-016	Testing the Update Functionality of reservation's title with valid data	Checking the updating of reservation's title by user with valid data	1. The user is logged in 2. The main page of the site is opened	Email: testmail@gmail.com Password: 01test_passWord	1. Click the 'My profile' button in the navbar	The user's profile page is opened	As expected	Pass		
					2. Click the 'Update' button in the reservation	The updating page is opened	As expected	Pass		
					3. Enter the new valid data into the 'Title' field	The entered data is accepted	As expected	Pass		
					4. Click the 'Update' button	The updated reservation is shown in the profile with the new title	As expected	Pass		
TC-017	Testing the Update Functionality of reservation's title with invalid data	Checking the updating of reservation's title by user with invalid data	1. The user is logged in 2. The main page of the site is opened	Email: testmail@gmail.com Password: 01test_passWord	1. Click the 'My profile' button in the navbar	The user's profile page is opened	As expected	Pass		
					2. Click the 'Update' button in the reservation	The updating page is opened	As expected	Pass		

					3. Enter the new invalid data into the 'Title' field	The entered data is not accepted and the warning message is shown	As expected	Pass	
					4. Click the 'Update' button	The reservation's title is not updated	As expected	Pass	
TC-018	Testing the Update Functionality of reservation's date with valid data	Checking the updating of reservation's date by user with valid data	1. The user is logged in 2. The main page of the site is opened	Email: testmail@gmail.com Password: 01test_passWord	1. Click the 'My profile' button in the navbar	The user's profile page is opened	As expected	Pass	
					2. Click the 'Update' button in the reservation	The updating page is opened	As expected	Pass	
					3. Choose the new valid time from the calendar	The chosen time is accepted	As expected	Pass	
					4. Click the 'Update' button	The updated reservation is shown in the profile with the new date	As expected	Pass	
TC-019	Testing the Update Functionality of reservation's date with invalid data	Checking the updating of reservation's date by user with invalid data	1. The user is logged in 2. The main page of the site is opened	Email: testmail@gmail.com Password: 01test_passWord	1. Click the 'My profile' button in the navbar	The user's profile page is opened	As expected	Pass	
					2. Click the 'Update' button in the reservation	The updating page is opened	As expected	Pass	
					3. Choose the new invalid time from the calendar	The chosen time is not accepted and the warning message is shown	As expected	Pass	
					4. Click the 'Update' button	The reservation's time is not updated	As expected	Pass	
TC-020	Testing the Delete Functionality of the reservation	Checking the deleting of the reservation by user	1. The user is logged in 2. The main page of the site is opened	Email: testmail@gmail.com Password: 01test_passWord	1. Click the 'My profile' button in the navbar	The user's profile page is opened	As expected	Pass	
					2. Click the 'Delete' button in the reservation	The confirmation dialog is opened	As expected	Pass	
					3. Click the confirming button	The reservation is deleted successfully	As expected	Pass	
					4. Check the profile page for the available reservations	The deleted reservation is not shown in the list	As expected	Pass	
TC-021	Testing the Payment Functionality of the reservation	Checking the payment for the reservation by user	1. The user is logged in 2. The main page of the site is opened	Email: testmail@gmail.com Password: 01test_passWord	1. Click the 'My profile' button in the navbar	The user's profile page is opened	As expected	Pass	
					2. Click the 'Pay' button in the reservation	The payment is successful and the invoice is sent to email	As expected	Pass	
					3. Check the profile page for the paid reservation	The reservation is paid	As expected	Pass	

TC-022	Testing the Cancel Functionality of the reservation	Checking the canceling of the reservation by user	1. The user is logged in 2. The main page of the site is opened	Email: testmail@gmail.com Password: 01test_passWord	1. Click the 'My profile' button in the navbar	The user's profile page is opened	As expected	Pass		
					2. Click the 'Cancel' button in the reservation	The confirmation dialog is opened	As expected	Pass		
					3. Click the confirming button	The reservation is canceled successfully	As expected	Pass		
					4. Check the profile page for the available reservations	The canceled reservation is not shown in the list	As expected	Pass		
TC-023	Testing the displaying reservations	Checking the displaying of the created reservations by user in the profile	1. The user is logged in 2. The main page of the site is opened	Email: testmail@gmail.com Password: 01test_passWord	1. Click the 'My profile' button in the navbar	The user's profile page is opened	As expected	Pass		
					2. Check the profile page for the available reservations	The created reservations are correctly shown in the profile	As expected	Pass		
TC-024	Testing the displaying total sum for reservations	Checking the displaying of the total sum for the user's reservations in the profile	1. The user is logged in 2. The main page of the site is opened	Email: testmail@gmail.com Password: 01test_passWord	1. Click the 'My profile' button in the navbar	The user's profile page is opened	As expected	Pass		
					2. Check the profile page for the available reservations	The created reservations are correctly shown in the profile	As expected	Pass		
					3. Check the total sum of the reservations according to its price per hour and reserved time	The total sum is calculated and shown correctly	As expected	Pass		
TC-025	Testing the displaying reservations in the calendar for guest	Checking the displaying of the created users' reservations in the calendar for guest	None	None	1. Go to the site: https://openspaces.azurewebsites.net/OpenSpace	The site is opened	As expected	Pass		
					2. Click the workspace card	The workspace page with all details is opened	As expected	Pass		
					3. Check the calendar for the available reservations	The created reservations are displayed correctly in the calendar	As expected	Pass		
TC-026	Testing the displaying reservations in the calendar for user	Checking the displaying of the created user's reservations in the calendar for user	1. The user is logged in 2. The main page of the site is opened	Email: testmail@gmail.com Password: 01test_passWord	1. Click the workspace card	The workspace page with all details is opened	As expected	Pass		
					2. Check the calendar for the available reservations	The created reservations are displayed correctly in the calendar	As expected	Pass		

TC-027	Testing the displaying reservations in the calendar for admin	Checking the displaying of the created user's reservations in the calendar for admin	1. The admin is logged in 2. The main page of the site is opened	Email: admin@gmail.com Password: Qwerty1-	1. Click the workspace card	The workspace page with all details is opened	As expected	Pass		
					2. Check the calendar for the available reservations	The created reservations are displayed correctly in the calendar	As expected	Pass		
TC-028	Testing the displaying date in the calendar for guest	Checking the displaying date in the calendar for guest	None	None	1. Go to the site: https://openspaces.azurewebsites.net/OpenSpace	The site is opened	As expected	Pass		
					2. Click the workspace card	The workspace page with all details is opened	As expected	Pass		
					3. Check the date in the calendar	The date is displayed correctly in the calendar	As expected	Pass		
TC-029	Testing the switching date forward in the calendar for guest	Checking the switching date forward for looking for the available time in the calendar for guest	None	None	1. Go to the site: https://openspaces.azurewebsites.net/OpenSpace	The site is opened	As expected	Pass		
					2. Click the workspace card	The workspace page with all details is opened	As expected	Pass		
					3. Click the right arrow-button in the calendar to switch tha date	The date is switched per week forward in the calendar displaying all the created reservations	As expected	Pass		
TC-030	Testing the switching date backward in the calendar for guest	Checking the switching date backward for looking for the available time in the calendar for guest	None	None	1. Go to the site: https://openspaces.azurewebsites.net/OpenSpace	The site is opened	As expected	Pass		
					2. Click the workspace card	The workspace page with all details is opened	As expected	Pass		
					3. Click the left arrow-button in the calendar to switch tha date	The date is switched per week backward in the calendar displaying all the created reservations	As expected	Pass		
TC-031	Testing the switching date to the current date in the calendar for guest	Checking the switching date to the current date for looking for the available time in the calendar for guest	None	None	1. Go to the site: https://openspaces.azurewebsites.net/OpenSpace	The site is opened	As expected	Pass		
					2. Click the workspace card	The workspace page with all details is opened	As expected	Pass		

					3. Click the right or left arrow-button in the calendar to switch tha date	The date is switched per week forward or backward in the calendar displaying all the created reservations	As expected	Pass		
					4. Click the 'Today' button in the calendar	The date is switched to the current date in the calendar displaying all the created reservations	As expected	Pass		
TC-032	Testing the displaying date in the calendar for user	Checking the displaying date in the calendar for user	1. The user is logged in 2. The main page of the site is opened	Email: testmail@gmail.com Password: 01test_passWord	1. Click the workspace card	The workspace page with all details is opened	As expected	Pass		
					2. Check the date in the calendar	The date is displayed correctly in the calendar	As expected	Pass		
TC-033	Testing the switching date forward in the calendar for user	Checking the switching date forward for looking for the available time in the calendar for user	1. The user is logged in 2. The main page of the site is opened	Email: testmail@gmail.com Password: 01test_passWord	1. Click the workspace card	The workspace page with all details is opened	As expected	Pass		
					2. Click the right arrow-button in the calendar to switch tha date	The date is switched per week forward in the calendar displaying all the created reservations	As expected	Pass		
TC-034	Testing the switching date backward in the calendar for user	Checking the switching date backward for looking for the available time in the calendar for user	1. The user is logged in 2. The main page of the site is opened	Email: testmail@gmail.com Password: 01test_passWord	1. Click the workspace card	The workspace page with all details is opened	As expected	Pass		
					2. Click the left arrow-button in the calendar to switch tha date	The date is switched per week backward in the calendar displaying all the created reservations	As expected	Pass		
TC-035	Testing the switching date to the current date in the calendar for user	Checking the switching date to the current date for looking for the available time in the calendar for user	1. The user is logged in 2. The main page of the site is opened	Email: testmail@gmail.com Password: 01test_passWord	1. Click the workspace card	The workspace page with all details is opened	As expected	Pass		
					2. Click the right or left arrow-button in the calendar to switch tha date	The date is switched per week forward or backward in the calendar displaying all the created reservations	As expected	Pass		
					3. Click the 'Today' button in the calendar	The date is switched to the current date in the calendar displaying all the created reservations	As expected	Pass		

TC-036	Testing the displaying date in the calendar for admin	Checking the displaying date in the calendar for admin	1. The admin is logged in 2. The main page of the site is opened	Email: admin@gmail.com Password: Qwerty1-	1. Click the workspace card	The workspace page with all details is opened	As expected	Pass		
					2. Check the date in the calendar	The date is displayed correctly in the calendar	As expected	Pass		
TC-037	Testing the switching date forward in the calendar for admin	Checking the switching date forward for looking for the available time in the calendar for admin	1. The admin is logged in 2. The main page of the site is opened	Email: admin@gmail.com Password: Qwerty1-	1. Click the workspace card	The workspace page with all details is opened	As expected	Pass		
					2. Click the right arrow-button in the calendar to switch tha date	The date is switched per week forward in the calendar displaying all the created reservations	As expected	Pass		
TC-038	Testing the switching date backward in the calendar for admin	Checking the switching date backward for looking for the available time in the calendar for admin	1. The admin is logged in 2. The main page of the site is opened	Email: admin@gmail.com Password: Qwerty1-	1. Click the workspace card	The workspace page with all details is opened	As expected	Pass		
					2. Click the left arrow-button in the calendar to switch tha date	The date is switched per week backward in the calendar displaying all the created reservations	As expected	Pass		
TC-039	Testing the switching date to the current date in the calendar for admin	Checking the switching date to the current date for looking for the available time in the calendar for admin	1. The admin is logged in 2. The main page of the site is opened	Email: admin@gmail.com Password: Qwerty1-	1. Click the workspace card	The workspace page with all details is opened	As expected	Pass		
					2. Click the right or left arrow-button in the calendar to switch tha date	The date is switched per week forward or backward in the calendar displaying all the created reservations	As expected	Pass		
					3. Click the 'Today' button in the calendar	The date is switched to the current date in the calendar displaying all the created reservations	As expected	Pass		
TC-040	Testing the Search Functionality of the reservations with valid data for guest	Checking the searching of the reservations by title with valid data for guest	None	None	1. Go to the site: https://openspaces.azurewebsites.net/OpenSpace	The site is opened	As expected	Pass		
					2. Click the workspace card	The workspace page with all details is opened	As expected	Pass		
					3. Ented the valid data into the 'Title' field	The entered data is accepted	As expected	Pass		

					4. Click the 'Search' button	The reservations are searched according to the entered title	As expected	Pass	
					5. Check the search results	The appropriate results are shown on the page	As expected	Pass	
TC-041	Testing the Search Functionality of the reservations with invalid data for guest	Checking the searching of the reservations by title with invalid data for guest	None	None	1. Go to the site: https://openspaces.azurewebsites.net/OpenSpace	The site is opened	As expected	Pass	
					2. Click the workspace card	The workspace page with all details is opened	As expected	Pass	
					3. Ented the invalid data into the 'Title' field	The entered data is accepted	As expected	Pass	
					4. Click the 'Search' button	The reservations are searched according to the entered title	As expected	Pass	
					5. Check the search results	The message 'There are no results' are shown on the page	As expected	Pass	
TC-042	Testing the Search Functionality of the reservations with empty field for guest	Checking the searching of the reservations by title with empty field for guest	None	None	1. Go to the site: https://openspaces.azurewebsites.net/OpenSpace	The site is opened	As expected	Pass	
					2. Click the workspace card	The workspace page with all details is opened	As expected	Pass	
					3. Leave the 'Title' field empty	The entered data is accepted	As expected	Pass	
					4. Click the 'Search' button	The warning message 'Please, enter the title' is shown	As expected	Pass	
TC-043	Testing the Search Functionality of the reservations with valid data for user	Checking the searching of the reservations by title with valid data for user	1. The user is logged in 2. The main page of the site is opened	Email: testmail@gmail.com Password: 01test_passWord	1. Click the workspace card	The workspace page with all details is opened	As expected	Pass	
					2. Ented the valid data into the 'Title' field	The entered data is accepted	As expected	Pass	
					3. Click the 'Search' button	The reservations are searched according to the entered title	As expected	Pass	
					4. Check the search results	The appropriate results are shown on the page	As expected	Pass	
TC-044	Testing the Search Functionality of the reservations with invalid data for user	Checking the searching of the reservations by title with invalid data for user	1. The user is logged in 2. The main page of the site is opened	Email: testmail@gmail.com Password: 01test_passWord	1. Click the workspace card	The workspace page with all details is opened	As expected	Pass	

					2. Ented the invalid data into the 'Title' field	The entered data is accepted	As expected	Pass		
					3. Click the 'Search' button	The reservations are searched according to the entered title	As expected	Pass		
					4. Check the search results	The message 'There are no results' are shown on the page	As expected	Pass		
TC-045	Testing the Search Functionality of the reservations with empty field for user	Checking the searching of the reservations by title with empty field for user	1. The user is logged in 2. The main page of the site is opened	Email: testmail@gmail.com Password: 01test_passWord	1. Click the workspace card	The workspace page with all details is opened	As expected	Pass		
					2. Leave the 'Title' field empty	The entered data is accepted	As expected	Pass		
					3. Click the 'Search' button	The warning message 'Please, enter the title' is shown	As expected	Pass		
TC-046	Testing the Search Functionality of the reservations with valid data for admin	Checking the searching of the reservations by title with valid data for admin	1. The admin is logged in 2. The main page of the site is opened	Email: admin@gmail.com Password: Qwerty1-	1. Click the workspace card	The workspace page with all details is opened	As expected	Pass		
					2. Ented the valid data into the 'Title' field	The entered data is accepted	As expected	Pass		
					3. Click the 'Search' button	The reservations are searched according to the entered title	As expected	Pass		
					4. Check the search results	The appropriate results are shown on the page	As expected	Pass		
TC-047	Testing the Search Functionality of the reservations with invalid data for admin	Checking the searching of the reservations by title with invalid data for admin	1. The admin is logged in 2. The main page of the site is opened	Email: admin@gmail.com Password: Qwerty1-	1. Click the workspace card	The workspace page with all details is opened	As expected	Pass		
					2. Ented the invalid data into the 'Title' field	The entered data is accepted	As expected	Pass		
					3. Click the 'Search' button	The reservations are searched according to the entered title	As expected	Pass		
					4. Check the search results	The message 'There are no results' are shown on the page	As expected	Pass		
TC-048	Testing the Search Functionality of the reservations with empty field for admin	Checking the searching of the reservations by title with empty field for admin	1. The admin is logged in 2. The main page of the site is opened	Email: admin@gmail.com Password: Qwerty1-	1. Click the workspace card	The workspace page with all details is opened	As expected	Pass		
					2. Leave the 'Title' field empty	The entered data is accepted	As expected	Pass		
					3. Click the 'Search' button	The warning message 'Please, enter the title' is shown	As expected	Pass		

TC-049	Testing the displaying of the workspaces' image on the main page for guest	Checking the displaying of the workspaces' image on the main page for guest	None	None	1. Go to the site: https://openspaces.azurewebsites.net/OpenSpace	The site is opened	As expected	Pass		
					2. Check the displaying of the available workspaces	The available workspaces are displayed correctly	As expected	Pass		
TC-050	Testing the displaying of the workspaces' image on the main page for user	Checking the displaying of the workspaces' image on the main page for user	The user is registered on the site	Email: testmail@gmail.com Password: 01test_passWord	1. Go to the site: https://openspaces.azurewebsites.net/OpenSpace	The site is opened	As expected	Pass		
					2. Click the 'Login' button in the navbar	The login page is opened	As expected	Pass		
					3. Enter the valid data into the fields	The entered data is accepted	As expected	Pass		
					4. Click the 'Sign In' button	The user is logged in and on the main page	As expected	Pass
